Dear friend

I am very happy this day as I write to you this letter. I am living in a community called Oftaka. Here in this community the rain delayed so much that it has just started and even planting and digging have also just started after the sun dried most of the crops in the gardens this time especially Simsim. The crops grown here in my land are cassava, millet, Simsim, groundnuts, potatoes, peas, sorghum and green vegetable like cabbages.

We live in grass thatch huts made of mud wall. I am happy again to be your friend all the way from Oftaka. May God bless you for choosing me.

Hope to hear from you also.
