

DEALING WITH INFECTIOUS DISEASES POLICY

The Education and Care Services National Regulations requires education and care services implement specific strategies to minimise the spread of infectious illness and maintain a healthy environment for all Children, Staff, Educators and Families. The spread of infections in the education and care environment is facilitated by microbial contamination of the environment, as well as greater exposure to young children who are still developing hygienic behaviours and habits.

Activity Centres Inc (ACI) will minimise Children's and Staff's exposure to infectious diseases by adhering to all recommended guidelines from relevant authorities regarding the prevention of infectious diseases, promoting practices that reduce the transmission of infection, ensuring the exclusion of sick children and educators, supporting child immunisation, and implementing effective hygiene practices.

NATIONAL QUALITY STANDARD (NQS)

QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY		
2.1	Health	Each child's health and physical activity is supported and promoted.
2.1.1	Wellbeing and comfort	Each child's wellbeing and comfort is provided for, including appropriate opportunities to meet each child's needs for sleep, rest and relaxation.
2.1.2	Health practices and procedures	Effective illness and injury management and hygiene practices are promoted and implemented.
2.2	Safety	Each child is protected.

EDUCATION AND CARE SERVICES NATIONAL LAW AND NATIONAL REGULATIONS	
S. 2A	Paramount consideration - safety, rights and best interests of children
S. 3A	Paramount consideration
S. 172	Offence to fail to display prescribed information
S.174(2)(a)	Serious incident- any emergency for which emergency services attended
12	Meaning of serious incident
77	Health, hygiene and safe food practices
83	Staff members and family day care educators not to be affected by alcohol or drugs
85	Incident, injury, trauma and illness policies and procedures
86	Notification to parents of incident, injury, trauma and illness

87	Incident, injury, trauma and illness record
88	Infectious diseases
89	First aid kits
90	Medical conditions policy
92	Medication record
93	Administration of medication
162	Health information to be kept in enrolment record
168	Education and care service must have policies and procedures
170	Policies and procedures to be followed
173	Prescribed information to be displayed
175(2)(c)	Prescribed information to be notified to the Regulatory Authority- (2) any circumstance arising at the service that poses a risk to the health, safety or wellbeing of a child or children attending the service

3	Families and Communities are informed and involved
5	People working with children are suitable and supported.
7	Staff are equipped with the knowledge, skills and awareness to keep children safe through continual education and training.
8	Physical and online environments minimize the opportunity for abuse to occur.
10	Policies and Procedures document how the organisation is Child Safe

PURPOSE

Children encounter many other children and adults within the Service environment which can result in the contraction of infectious illnesses. Our Service has a duty of care to ensure that children families, Educators, and Visitors of our Services are provided with a high level of protection during the hours of operation. We aim to minimise cross contamination and the spread of infectious illnesses by implementing best practice and high standards of personal hygiene infection control and supervision while supporting children's emotional wellbeing during illness and exclusion periods within our Organization's Services.

This policy communicates clear directions and guidance about protocols and actions to be followed to avoid adversely affecting the safety and health of children, other staff members and visitors to the service. A simple, safe and effective way of protecting individuals and others within the community against harmful diseases is immunisation. All decisions relating to illness management, exclusion, outbreak response and attendance during infectious disease risks are guided by the paramount consideration of children's safety, health, rights and best interests.

SCOPE

This policy applies to Children, Families, Staff, Educators, Approved Provider, Nominated Supervisor, Students, Volunteers and Visitors.

IMPLEMENTATION

Under the Education and Care Services National Regulations, the Approved Provider must ensure policies and procedures are in place in relation to dealing with infectious diseases. (ACECQA, August 2021).

Our Service is committed to minimise the spread of infectious diseases and viruses by implementing recommendations as stated in the [Staying healthy: Preventing infectious diseases in early childhood education and care services \(6th Edition\)](#) developed by the Australian Government National Health and Medical Research Council and advice provided from the Australian Health Protection Principal Committee (AHPPC).

We are guided by decisions regarding exclusion periods and notification of infectious diseases by the *Australian Government- Department of Health* and local Public Health Units in our jurisdiction as per the Public Health Act.

This policy must be read in conjunction with our other Quality Area 2 policies:

- Immunisation Policy
- Incident, Illness, Accident and Trauma Policy and
- Medical Conditions Policy and
- Child Protection Policy

Infectious disease management practices will be implemented in a manner that upholds child safe principles, including adequate supervision, respectful interactions, protection of children's dignity and privacy, and emotional wellbeing, particularly when children are isolated or unwell.

DEFINITION OF AN INFECTIOUS DISEASE

In relation to a participating jurisdiction, means an infectious disease that is designated under a law of that jurisdiction or by a health authority (however described) as a disease that would require a person with the disease to be excluded from an education and care service (Definitions- Education and Care Services National Regulations).

PREVENTING INFECTIOUS DISEASES

Children often enter school and education and care services when their immune systems are still developing. They have not been exposed to many common germs and therefore are susceptible to bacteria that may cause infections. Given the close physical contact children have with other children in the Service it is very easy for infectious diseases and illnesses to spread through normal daily activities as germs can be picked up directly from an infected person or from the environment. It is important to understand that an infected person may not show any signs or symptoms of illness.

ACI implements rigorous hygienic practices to limit the spread of illness and infectious diseases including:

- immunisation- for children and adults
- effective hand washing hygiene
- respiratory hygiene- cough and sneeze etiquette
- appropriate use of gloves and other PPE
- exclusion of Children, Educators or Staff when they are unwell or displaying symptoms of an infectious disease or virus.
- effective environmental cleaning including toys and resources
- encouraging use of the outdoors environment
- ensuring adequate ventilation
- encouraging children, educators or staff to seek medical attention and get tested if they show symptoms of an infectious disease or virus

IMMUNISATION REQUIREMENTS

Immunisation is a reliable way to prevent many childhood infectious diseases. When enrolling a child at one of our services, parents will be asked to provide an Immunisation History Statement. Should a child not be fully immunised according to the National Immunisation Program Schedule, they **will not** be prevented from enrolling in our OOSH Services but **will** be prevented from enrolling in our Long Day care Service, unless they have an approved medical exemption or are on a

recognized catch-up schedule.

- Only parents of children who are fully immunised or are on a recognised catch-up schedule or have an approved medical exemption recorded on the Australian Immunisation Register (AIR) can receive Child Care Subsidy (CCS)
- Educators and other staff at our Service are highly recommended to keep up to date with all immunisations including yearly influenza vaccinations. These include recommended vaccinations outlined in the *Australian Immunisation Handbook* and the *Staying healthy: Preventing infectious diseases in early childhood education and care services*.
- Vaccination is important as not only can staff members catch a potentially serious infection such as measles or whooping cough, but they could also then inadvertently pass it onto children in their care who are too young to have had their vaccinations or to women who may be pregnant.

EXCLUDING CHILDREN FROM THE SERVICE

'Excluding children, staff and parents who are at risk of transmitting infection to others limits the spread of infection in education and care services.' (Staying healthy, 2024, p. 75)

The need for exclusion and the length of time a person is excluded from the Service depends on:

- the type of infection
- if symptoms are present and how severe they are
- how easily the infection or disease can spread
- how long the person is likely to be infectious

When a child or adult has symptoms or has been diagnosed with an illness or infectious disease, the Service will refer to information about recommended exclusion periods from the Public Health Unit (PHU) and *Staying healthy: Preventing infectious diseases in early childhood education and care services, 6th edition*.

Although some illnesses will state *'not excluded'*, any child or staff member displaying symptoms of an illness or condition are encouraged to stay at home and/or seek medical advice for any concerning symptoms or if symptoms continue.

[Exclusion for common or concerning conditions](#)

- When an infectious disease has been diagnosed or suspected, the Service will display appropriate documentation and alerts for families including information on the illness/disease, symptoms, infectious period and the exclusion period. (Fact sheets are available [Staying Healthy Guidelines](#))
- If a vaccine preventable disease occurs in the Service, children who have not been fully immunised will be excluded from care; staff who are not vaccinated will be notified and should be excluded from the workplace. Management will check all children's Immunisation records and alert parents as required.

- Staff and children that have had diarrhea and/or vomiting will be excluded from the Service until there has not been any diarrhea or vomiting for at least 24 hours. If the diarrhea or vomiting are confirmed to be norovirus, they will be excluded until there has not been any diarrhea or vomiting for at least 48 hours. Staff who handle food will be excluded from the Service for up to 48 hours after they have stopped vomiting or having diarrhoea. [Staying healthy, 2024.]
- Decisions about exclusion will consider the child's wellbeing, family circumstances and public health advice, while prioritising the safety of all children and staff.

REPORTING OUTBREAKS TO THE PUBLIC HEALTH UNIT AND REGULATORY AUTHORITY (Reg. 175 (2)(C))

Outbreaks of communicable diseases and contagious viruses represent a threat to public health. To help prevent outbreaks, each state/territory Public Health Unit (PHU) monitors the number of people who contract certain infectious diseases and their characteristics, the recent travel or attendance of infected people in a public place or on public transport and works with health specialists and doctors to help prevent the transmission of diseases to other people.

Public health legislation across all states/territories lawfully requires and authorises doctors, hospitals, laboratories, school principals and childcare centre directors to confidentially notify the Public Health Unit of patients with certain conditions, and to provide the required information on the notification forms. Specialist trained public health staff review this information and if necessary, contact the patient's doctor, and sometimes the patient, to provide advice about disease control and to complete the collection of information.

All notifications and displays will protect the privacy of infected children, families and staff in line with privacy legislation and the Service's *Privacy and Confidentiality Policy*. Under the Commonwealth Privacy Acts, patient information is only released/disclosed where it is lawfully required or authorised.

The Approved Provider is required to notify the local PHU by phone as soon as possible (within 24 hours) after they are made aware that a child enrolled at the Service is suffering from one of the following vaccine preventable diseases.

- Diphtheria
- Hib (Haemophilus influenzae type b)
- Mumps
- Poliomyelitis
- Meningococcal disease
- Rubella ('German measles')
- Measles
- Pertussis ('whooping cough')
- Tetanus

Notification is also required for:

- Gastroenteritis (if 2 or more people are affected and an outbreak is suspected)

Management will closely monitor health alerts and guidelines from Public Health Units and the Australian Government-Department of Health for any advice and emergency health management in the event of a contagious illness outbreak. The Approved Provider must also notify the regulatory authority of any incidence of a notifiable infectious disease or illness that poses a risk to health, safety and wellbeing of children within 24 hours.

THE APPROVED PROVIDER /NOMINATED SUPERVISOR/COORDINATOR WILL ENSURE:

- that obligations under the Education and Care Services National Law and Education and Care Services National Regulations are met
- Educators, Staff, Students, Visitors and Volunteers have knowledge of and adhere to this policy and associated procedure
- all new employees are provided with a copy of this policy as part of their induction process
- families are aware of this *Dealing with Infectious Diseases Policy* upon enrolment
- children are protected from harm by ensuring relevant policies and procedures are followed regarding health and safety within the Service
- an Immunisation History Statement for each child is requested on enrolment regarding the child's immunisation status (AIR) and any medical conditions
- the Service implements recommendations from [*Staying healthy: Preventing infectious diseases in early childhood education and care services- 6th Edition*](#) to maintain a healthy environment
- that all information regarding the prevention of infectious diseases is sourced from a recognised health authority [Australian Government Department of Health, Disability and Ageing](#)
- exclusion periods for people with infectious diseases recommended by Government Authorities are implemented for all staff, children, parents, families and visitors
- that wall charts about immunisation are displayed at our Long daycare Service
- the Public Health Unit is notified as soon as possible after they are made aware that a child enrolled has a vaccinated preventable disease
- the Public Health Unit is notified in the event of an outbreak of viral gastroenteritis. Management must document the number of cases, dates of onset, duration of symptoms. An outbreak is when two or more children or staff have a sudden onset of diarrhoea or vomiting in a 2-day period.
- after confirmation that a child is suffering from an infectious disease, and as soon as practical, the family of each child enrolled in the Service must be notified whilst maintaining the privacy of the ill/infectious child. Communication may be:

- verbal
- through a letter from the educator or approved provider
- via electronic message- text message or email
- notice clearly displayed at the Service
- families are advised that they are requested to alert the Service if their child is diagnosed with an infectious illness
- daily attendance records for staff, children and visitors are up to date at all times
- safe health and hygiene practices are implemented at all times
- Educators and Staff routinely role model hand washing, hand drying, cough and sneeze etiquette
- effective environmental cleaning policies and procedures are adhered to all times
- children are supported in their understanding of health and hygiene practices throughout the daily program and routine (hand washing, hand drying, cough and sneeze etiquette)
- families are provided with relevant sourced materials and information on infectious diseases, health, and hygiene including:
 - the current National Immunisation Schedule
 - exclusion guidelines in the event of a vaccine preventable illness at the Service for children that are not immunised or have not yet received all their immunisations
 - advice and information regarding any infectious diseases in general and information regarding any specific infectious illnesses that are suspected/present in the Service.
- all educators are mindful and maintain confidentiality of individual children's medical circumstances
- that opportunities for educators to source pertinent up to date information from trusted sources on the prevention of infectious diseases and maintaining health and hygiene are provided
- families are advised to keep children at home if they are unwell and not return to the Service until they have improved
- the recommended minimum exclusion periods from *Staying healthy* are followed for children or staff depending on their symptoms or disease and whether a medical professional has diagnosed a specific condition
- to minimise the chance of disease/illness spreading, children must be well for 24 hrs before returning to the Service
- to complete the register of *Incident, Injury, Trauma or Illness* and/or document incidents of infectious diseases no later than 24 hours of an illness or infectious disease occurring in the Service
- a review of practices is conducted following an outbreak of illness or infectious diseases at the Service, including an assessment of areas for improvement
- Educators or Staff who have diarrhoea or an infectious disease do not handle food for others and are not to return to work until they have been symptom free for 48 hours
- any risk to a child or adult with complex medical needs is minimised in the event of an outbreak of an infectious disease or virus. This may require a risk assessment and decision-making regarding the suitability of attendance of the child or staff member during this time.

EDUCATORS WILL ENSURE:

- that any child suspected of having an infectious illness is responded to and their health and emotional needs are supported.
- any child suspected of having an infectious illness is separated from other children and supervised by an Educator or Staff member whilst waiting for collection by parents/guardian or emergency contact person
- they apply child safe practices when caring for unwell children, including maintaining professional boundaries and respectful physical contact
- they maintain children's dignity and privacy when managing symptoms, applying first aid or supporting hygiene needs
- ensure supervision arrangements are adjusted as required during outbreaks or increased illness to maintain child safety at all times
- that appropriate health and safety procedures are implemented when treating ill children e.g.; wear disposable gloves, or other PPE if needed
- families are aware of the need to collect their unwell child/ children as soon as practicable from the Service
- all resources or items touched by a child with a suspected illness are thoroughly cleaned and disinfected e.g.; cushions, toys
- opportunities are provided for children to participate in hygiene practices, including routine opportunities, and intentional practice such as hand washing, sneezing and cough etiquette
- consideration is given to the combination of children to decrease the risk of attaining an infectious illness when planning the routines/program of the day
- they adhere to the Service's Hygiene and Cleaning Policy including:
 - hand washing
 - daily cleaning of the Service
 - wearing gloves (particularly when in direct contact with bodily fluids)
 - appropriate and hygienic handling and preparation of food
 - providing adequate ventilation to reduce the transmission of diseases that are airborne
- they maintain up-to-date knowledge regarding best practice principles and high standards of hygiene to reduce the spread of spread of infectious disease and promote good health and safety.
- bedding is cleaned using detergent and water after each use and if the surface is known to be contaminated with a potential infectious disease, disinfectant is also used to clean beds.
- that all play dough is freshly made every week. If there is an outbreak of vomiting and/or diarrhoea, or any other contagious communicable disease, play dough is to be discarded at the end of each day and a new batch made each day or not used for the duration of the outbreak
- children and adults wash their hands before and after using play dough.

PREVENTION STRATEGIES FOR MINIMISING THE SPREAD OF DISEASE WITHIN ALL OUR SERVICE STAFF AND EDUCATORS WILL ENSURE:

- a healthy environment is provided through adherence to the [Staying Healthy cleaning guidelines](#)
- utility gloves are worn and washed and dried between uses
- surfaces are cleaned first with detergent and water before using disinfectants. (Disinfectants cannot kill germs unless areas are clean)
- that a daily clean is carried out on other surfaces that may transmit germs such as high touch objects including doorknobs, tables, light switches, handles, remotes, play gyms, low shelving, etc. This will be increased several times a day if an outbreak of an infectious disease/virus has been recorded in the Service or to minimise the risk of transmission of a virus such as COVID-19.
- that if a child has a toileting accident, the items are placed in a plastic bag with the child's name on it. The plastic bag will be stored in a sealed container labelled 'soiled/wet clothing' for parents to take home.
- cloths and mops are colour coded so that a separate cloth or mop is used to clean floors, bathroom, art and craft, and meal surfaces
- detachable mop heads and cloths are washed in a washing machine using hot water and air dried
- all washable toys/equipment out on display for the children are to be washed on a weekly basis to decrease the risk of cross contamination and recorded with the date and a signature as evidence.
- toys and equipment (that are difficult to wash) will be washed with detergent (or soap and water) and air-dried in sunlight
- washable toys and equipment will be washed in detergent and hot water or the dishwasher and aired to dry (toys will not be washed in the dishwasher at the same time as dishes). All toys and equipment that have been cleaned will be recorded on the toy cleaning register.
- all cleaning procedures will be recorded on the Service's Cleaning Checklist
- all cushions, including floor cushions, should have removeable cushion covers and will be laundered regularly as well as whenever they are visibly dirty or contaminated
- floor surfaces will be cleaned on a daily basis after each meal and at the end of each day
- toilets/bathrooms will be cleaned following before school care sessions, the end of the day and whenever needed throughout the day using detergent and water followed by disinfectant and paper towel
- when cleaning up spills of faeces, vomit or urine off floors, bathrooms etc. educators will use disinfectant on the surface after cleaning it with detergent and warm water
- For our OOSH Services, pregnant staff members should not assist in toileting or cleaning up toileting accidents to prevent unexpected cross contamination and risk of contracting [Cytomegalovirus \(CMV\)](#). The occupational risks of CMV infection must be discussed with management of the Service.

IN ADDITION TO THE ABOVE OUR LONG DAY CARE SERVICE WILL ALSO:

- that any toy that is mouthed by a child is placed immediately in the 'toys to be washed' basket and washed with warm soapy water at the end of the day. All washable toys out on display for the children are to be washed on a weekly basis to decrease the risk of cross contamination and recorded with the date and a signature as evidence.
- All Dummies are to be kept in individual sealed containers with the child's name, in their bag locker to decrease the risk of cross contamination.
- dummies are stored out of children's reach and never shared with other children
- toilets/bathrooms will be cleaned in the middle of the day, the end of the day and whenever needed throughout the day using detergent and water followed by disinfectant and paper towel
- management must ensure pregnant women are aware of the occupational risks and exposure to specific infectious diseases including Cytomegalovirus (CMV). Occupational risks of CMV in childcare should be individually managed and control measures implemented. Risk management may include ensuring pregnant women do not work with children under two years of age including avoiding changing nappies or assist in toileting or cleaning up toileting accidents to prevent unexpected cross contamination and risk of contracting Cytomegalovirus (CMV).

FAMILIES WILL:

- adhere to the Service's policies regarding *Dealing with Infectious Diseases, Immunisation and Incident, Injury, Trauma and Illness* and adhere to exclusion requirements
- alert the Service if their child is diagnosed with an infectious illness
- exclude their child from care for the recommended minimum exclusion period if they display symptoms of an infectious illness or disease
- adhere to exclusion periods in the event of a vaccine preventable disease occurring in the Service and their child is not fully immunised
- adhere to the Service's restrictions of entry into the Service in the event of an outbreak of an infectious disease or virus
- adhere to the Service's policy regarding Hand Washing
- exclude their child from care if they display symptoms of an infectious illness or disease or in the event of a vaccine preventable disease occurs in the Service and their child is not immunised fully
- for school aged children - advise the Service of their child's immunisation status, by providing approved written documentation for the Service to copy and place in the child's file
- for long day care children - advise the Service of their child's immunisation status, by providing a current Immunisation History Statement recorded on the Australian Immunisation Register (AIR) for the Service to copy and place in the child's file
- advise the Service when their child's immunisation/medical condition is updated to ensure that immunisation and medical records are up to date

- advise the Service when their child's medical management plan is updated
- for long day care children - provide sufficient spare clothing, particularly if the child is toilet training
- adhere to the Service's risk minimisation strategies if their child has complex medical needs in the event of an outbreak of an infectious disease or virus.
